

# DISTRIBUTOR APPLY

Please provide answers to the following questions in as much detail as possible. It is all optional but the more information the easier and faster we can move forward. This will help us assess your compatibility to SHELTER and help us frame the size of the opportunity that exists in the market in which you wish to operate and the service we will need to offer you in return. Once we have evaluated your answers we will be better positioned to discuss the next step. We will then request a meeting at our factory in China where you can see the structures and our production facilities.
